

Put your ancestors in order!

You are one of the latest additions to a family tree that goes all the way back to the very first life on Earth. These creatures all came before you, and without any one of them, you wouldn't be here! But in which order did they first appear? Cut them out and put them in chronological order – from the first life forms to the most recent.

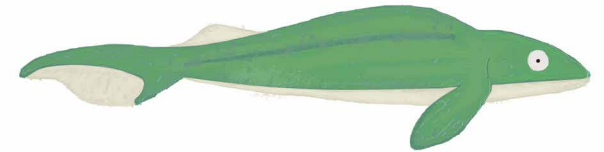

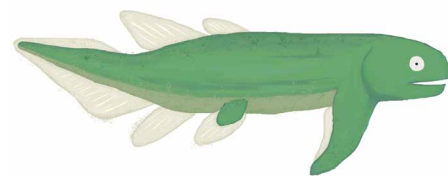

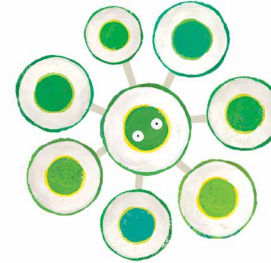

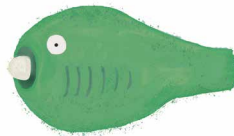

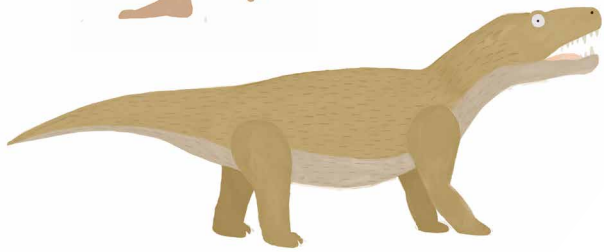

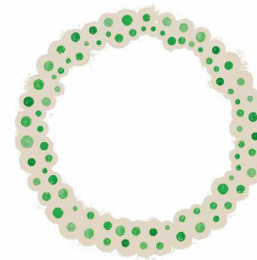

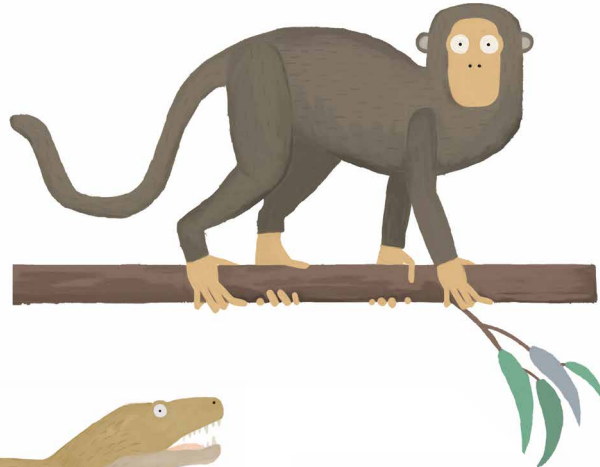

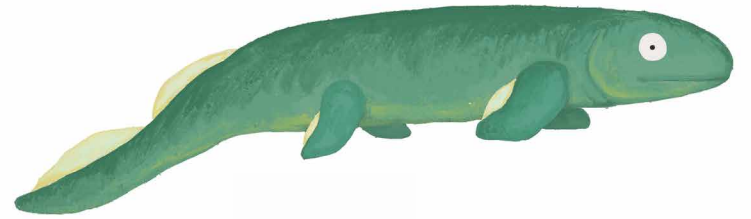

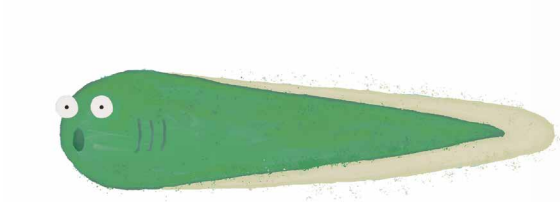

Hint/shameless plug! If you're stuck, pick up a copy of *How Did I Get Here?* or head to philipbunting.com/books/how-did-i-get-here
